

# FAST BOX "Model 47"

## Under Bed - Fast Access Hidden Gun Storage

Secures one tactical long gun, horizontally for fast access.

### Foam Padding

Place in bottom of box to protect firearm

## Lock Function with Key Override

### NOTE #1:

Store key in a secure place – NOT in Fast Box

#### 1. Open FAST box

- a) insert key into lock and turn clockwise
- b) turn the black knob clockwise to open

#### 2. Install 9 volt battery - Not Included

Remove the silver metal plate on the inside of door with Phillips head screwdriver to insert battery

### NOTE #2:

Factory push button combination is "1-2-3-4-1"

#### 3. Reset factory combination

- a) press and release the red button inside the door panel
- b) LED light will turn green indicating the system is ready
- c) push any sequence of buttons (up to 8) as your new combination while the green light is lite

### NOTE #3:

The green light stays lite for about 6 seconds

- d) immediately push red button again to retain code
- e) the LED light will blink green twice for confirmation

#### 4. Confirm that new combination works

- a) keep door open
- b) enter combination and turn knob to confirm it works
- c) if wrong code is entered the LED light will flash red after 8 digits
- d) wait 10 seconds for system to clear before re-entering

#### 5. Practice unlocking your box

The locking system will go into sleep mode 10 seconds after last entry

#### 6. If battery power gets low

- a) LED light will turn red if battery power get low
- b) key over ride will open box if battery loses power

#### 7. Lock box

- a) close door and turn knob counter clockwise to lock
