1. Open the Safe With the Key

a) Insert the key into the lock and turn counter-clockwise.

NOTE: Store key in a secure place–NOT inside the safe.

2. Install Batteries

a) Remove the battery compartment cover, and insert 4 new AA batteries (not included).

b) Reinstall the battery compartment cover.

3. USB-C Port

a) There is an integrated USB-C port on the right side of the touchscreen that can used to power the unit (USB-C cable not included).

3. Open the Safe With Touchscreen

a) Wake up the touchscreen either by waving your hand over it or touching a button.

b) Enter the default code "1-2-3-4".

c) The green light will illuminate, there will be 2 audible beeps and the safe will open.

d) The touchscreen will lock after 10 seconds if a partial code is entered, the red light will illuminate and there will be 3 audible beeps.

4. Set Personal Code

a) Press and hold the reset button, located inside the safe, for approximately 3 seconds.

b) There will be 2 audible beeps and the touchscreen will flash.

c) Enter a new code, 3 to 8 numbers in any sequence.

d) Press the reset button, there will be 2 audible beeps and the green light will flash once.

5. Turning the Sound Off

a) Press and hold the "1" button for approximately 3 seconds.

b) The touchscreen will turn off indicating it was successful and the sound is now off.

6. Turning the Sound On

a) Press and hold the "1" button for approximately 3 seconds.

b) The touchscreen will turn off and there will be an audible beep indicating it was successful and the sound is now on.

7. Alarm

a) If the wrong code is entered 5 times in a row, an alarm will sound for 1 minute.

b) After the alarm stops, the safe will be locked down for an additional minute.

c) The safe can be opened by the key during those 2 minutes.

8. Interior Light

a) When the correct code is entered and the safe opens, the light inside will illuminate for 30 seconds and then turn off automatically.

b) The light will not illuminate when unlocked with the key.

9. Mounting the Safe

a) It is recommended to mount the safe to a solid surface.

b) Lift the foam to access the 2 mounting holes located on the bottom of the safe.

c) Use the supplied hardware, as needed. You may need to purchase additional hardware for your specific installation needs.

10. Low Battery Indicator

a) When sound is on: Enter the correct code, the safe will open followed by 5 beeps.

b) When sound is off: Enter the correct code, the safe will open and the green light will quickly flash one time.
